Minutes of the Stated Meeting

May 18, 1966

The Stated Meeting of The Franklin Institute was held at 8.15 p.m. in the Lecture Hall preceded by a dinner in Franklin Hall at which four Gold Members were honored. Wynn Laurence LePage, President, presided and called the meeting to order with approximately 180 members and guests present.

Dr. LePage stated that the minutes of the Stated Meeting of March 16, 1966, were published in the April issue of the Journal. There being no additions or corrections, the minutes were approved as published. The President stated that the minutes of the Stated Meeting of April 20, 1966 will be published in the May issue of the Journal and will be presented for approval at the next Stated Meeting of The Institute.

Dr. LePage then introduced the speaker of the evening, Dr. Frederick V. Hunt, Rumford Professor of Physics and Gordon McKay Professor of Applied Physics, Harvard University, who delivered an address entitled, "Sound Channels in the Sea." Dr. Hunt presented an extremely interesting talk which was enthusiastically received by his audience and elicited many questions at its conclusion.

The President, after expressing warm thanks to Dr. Hunt on behalf of The Institute and those present, adjourned the meeting at 9.45 p.m.

Peter Geyelin
Secretary

Committee on Science and the Arts

(Abstract of Proceedings of Stated Meeting held Wednesday, October 13, 1965.)

Hall of the Committee,
Philadelphia, October 13, 1965.

Professor George W. Patterson, 3rd, in the Chair.

The following report was presented for final action:

No. 3451: Work of Herman F. Mark.

This report recommended the award of an Elliott Cresson Medal to Herman F. Mark, of Brooklyn, New York, "For his early work on the structure and properties of polymers and the mechanism of polymerization, his promotion of education in the field of polymers, and his stimulating the dissemination of technical knowledge about plastics by initiating, editing or writing articles, books and journals."

D. S. FAHRNEY,
Secretary to Committee.

INDEX TO VOLUME 281

January–June, 1966

SUBJECT INDEX

Papers are listed under subject headings with authors' names in parentheses following title of paper. Authors are listed with titles of their papers in alphabetical order in the Author Index.

A

Adaptive control. A study of the relationship between identification and optimization in adaptive control problems (Sworder), 198

Analytical methods. Direct computation matrices of electrical transmission lines (Pipes) Part 1: 275; Part 2: 387

Applied mathematics. Direct computation of transmission matrices of electrical transmission lines (Pipes) Part 1: 275; Part 2: 387

Astronomy. Cosmic ray astronomy (Reber), 1

B

Bingham flow. Heat transfer in steady rotatory flow of Bingham material between two co-axial cylinders (Kumar), 136

Blizzard, Everitt Pinnel: Cresson Medal, 435

Book Reviews

C

Carnot function. The Carnot function and the second law (Thomsen), 250
Chemistry. Indirect ultraviolet spectrophotometric determination of borohydride using acetone (Lichtenstein and Mras), 481
Circuit theory. Single threshold device realization subject to sensitivity requirements (Blomgren and Torng), 143
Clapeyron equation. On the Clapeyron equation (Potter), 423
Committee on Science and the Arts. Abstracts of meetings: April 13, 1966, 435; October 13, 1965, 525
Elliot Cresson: Special report, 263
Control Theory. Optimal design of regulators (Puri), 499
Cosmic rays. Cosmic ray astronomy (Reber), 1
Cresson Medal: Everitt Pinnel Blizzard, 435

D

Delta methods. Some improvements in the phase-plane delta method (Deekshatulu and Prusty), 154
Differential equation with periodic coefficients. Stability of linear periodic systems (Lion), 27
Discrete time systems. Estimation of the state of a nonlinear process in the presence of nongaussian noise and disturbances (Friedland and Bernstein), 455
Direct graphs. Some properties of cycle-free directed graphs and the identification of the longest path (Chen and Wing), 293
Direct linear graphs. On the realization of a(p,s)-digraph with prescribed degrees (Chen), 406
Dynamical systems. Equivalence of linear time-invariant dynamical systems (Anderson, Newcomb, Kalman and Youla), 371

E

Economic growth. Our greatest resource for economic growth (Allen), 90
Elastic-plastic frames. Piecewise linear behavior of elastic plastic frames (Lee and Heidebrecht), 324
Elasticity. Stress distribution in a thin rotating circular disk having transient shearing stress applied on the outer edge (Samanta), 315
Elasticity. An application of the Lagrangian multiplier method to a mixed boundary value problem (Citerley), 338
Elasticity and aeroelasticity. Stability of elastic and aeroelastic systems via Lyapunov's direct method (Wang), 51
Electric circuits. Direct computation of transmission matrices of electrical transmission lines (Pipes), Part 1: 275; Part 2: 387
Electrical engineering. A simple formulation procedure for state-space models of electric networks (Blackwell and Grigsby), 486
Electrical engineering. On the solution of a quadratic integral equation arising in signal design (Kurz, Nowosad and Saltzberg), 437
Electrical engineering. Optimal design of regulators (Puri), 499
Electrical networks. A simple formulation for state-space models of electric networks (Blackwell and Grigsby), 486
Electrical networks. The trunks in the topology of electrical networks (Mullineux and Reed), 188
Electrical transmission lines. Direct computation of transmission matrices of electrical lines (Pipes), Part 1: 275; Part 2: 387
Elliott Cresson: Special report on the life and works of Elliott Cresson (Hepburn), 263

Membership Roll of Honor, 365

C

Graph theory. Some properties of cycle-free directed graphs and the identification of the longest path (Chen & Wing), 293

H

Hamiltonian paths. The trunk in the topology of electrical networks (Mullineaux and Reed), 188
Heat transfer. On the Clapeyron equation (Potter), 423
Heat transfer in Bingham flow. Heat transfer in steady rotatory flow of Bingham material between two co-axial cylinders (Kumar), 136
Human resource. Our greatest resource for economic growth (Allen), 90
Hysteresis. Influence of hysteresis on nonlinear resonance (Hayashi), 379

I

Identification. A study of the relationship between identification and optimization in adaptive control problems (Sworder), 198
Information theory. Analysis of an extremum-seeking nonlinear system (Lavi and Mastascusa), 235
Inorganic chemistry. Indirect ultraviolet spectrophotomatic determination of borohydride using acetone (Lichtenstein and Mras), 481
Interpolation. Random sampling of random processes: Optimum linear interpolation (Leneman), 302

L

Lagrangian multiplier method. An application of the Lagrangian multiplier method to a mixed boundary value problem (Citerley), 338
Leadership. Our greatest resource for economic growth (Allen), 90
Library of The Franklin Institute
New Books, 97, 176, 272, 364, 434, 524
Linear graphs. The trunk in the topology of electrical networks (Mullineux and Reed), 188
Linear systems. Equivalence of linear time-invariant dynamical systems (Anderson, Newcomb, Kalman and Youla), 371
Linear systems. High order system analysis and design using the root locus method (Han and Thaler), 99
Linear systems. Identification of linear system dynamics using exponential spectral coefficients (Smith and Clement), 122

M

Meetings of The Franklin Institute
Minutes of the Stated Meetings: December 15, 1965, 96; January 19, 1966, 177; February 16, 1966, 274; March 16, 1966, 368; April 20, 1966, 436; May 18, 1966, 525

N

Network equivalence. Equivalence of linear time-invariant dynamical systems (Anderson, Newcomb, Kalman and Youla), 371
Network theory. A simple formulation procedure for state-space models of electric networks (Blackwell and Grigsby), 486
Non-elementary singular points for a pair of 1st order differential equations. On non-elementary singular points (Aggarwal), 41
Nongaussian noise. Estimation of the state of a nonlinear process in the presence of nongaussian noise and disturbances (Friedland and Bernstein), 455
Nonlinear process. Estimation of the state of a nonlinear process in the presence of nongaussian noise and disturbances (Friedland and Bernstein), 455
Non-linear systems. Some improvements in the phase-plane delta method (Deekshatulu and Prusty), 154
Nonlinear resonance. The influence of hysteresis on nonlinear resonance (Hayashi), 379
Nonlinear systems. Analysis of an extremum-seeking nonlinear system (Lavi and Mastascusa), 235
Nonlinear systems analysis. Volterra-Wiener functionals for the analysis of nonlinear systems (Ku and Wolf), 9
Nuclear analog states. Shell-model description of nuclear analog states (Fallieros), 179

Nuclear interactions. Shell-model description of nuclear analog states (Fallieros), 179

Nuclear physics. Shell-model description of nuclear analog states (Fallieros), 179

O

Optimal control. A study of the relationship between identification and optimization in adaptive control problems (Sworder), 198

Optimal control. Optimal design of regulators (Puri), 499

Oriented graphs. Some properties of cycle-free directed graphs and the identification of the longest path (Chen and Wing), 293

P

Partial differential equations. Stability analysis of elastic and aeroelastic systems via Lyapunov's direct method (Wang), 51

Particles. Cosmic ray astronomy (Reber), 1

Phase-plane method. Some improvements in the phase-plane delta method (Deekshatulu and Prusty), 154

Plastic analysis. Piecewise linear behavior of elastic-plastic frames (Lee and Heidebrecht), 324

Plasticity. Piecewise linear behavior of elastic-plastic frames (Lee and Heidebrecht), 324

Q

Quadratic integral equation. On the solution of a quadratic integral equation arising in signal design (Kurz, Nowosad and Saltzberg), 437

R

Random processes. Random sampling of random processes: Optimum linear interpolation (Leneman), 302

Random sampling. Random sampling of random processes: Optimum linear interpolation (Leneman), 302

Realizability. On the realization of a(p,s)-digraph with prescribed degrees (Chen), 406

Realization of single threshold functions. Single threshold device realization subject to sensitivity requirements (Blomgren and Torng), 143

Resonance. Influence of hysteresis on nonlinear resonance (Hayashi), 379

Root loci. High order system analysis and design using the root locus method (Han and Thaler), 99

S

Second law of thermodynamics. The Carnot function and the second law (Thomsen), 250

Series expansions. Stability of linear periodic systems (Lion), 27

Shear. Stress distribution in a thin rotating circular disk having transient shearing stress applied on the outer edge (Leneman), 315

Signal design. On the solution of a quadratic integral equation arising in signal design (Kurz, Nowosad and Saltzberg), 437

Singular points for a pair of 1st order differential equations. On non-elementary singular points (Aggarwal), 41

Spectral coefficients. Identification of linear system dynamics using exponential spectral coefficients (Smith and Clement), 122

Special pair of 1st order homogeneous differential equations. On non-elementary singular points (Aggarwal), 41

Stability of differential equations. Stability of linear periodic systems (Lion), 27

Stability. Stability analysis of elastic and aeroelastic systems via Lyapunov's direct method (Wang), 51

Stochastic processes in nonlinear systems. Volterra-Wiener functionals for the analysis of nonlinear systems (Ku and Wolf), 9

Strain-energy method. An application of the Lagrangian multiplier method to a mixed boundary value problem (Citerley), 338

Stress-strain. Stress distribution in a thin rotating circular disk having transient shearing stress applied on the outer edge (Samanta), 315

Switching functions. Single threshold device realization subject to sensitivity requirements (Blomgren and Torng), 143

Systems analysis. High order system analysis and design using the root locus method (Han and Thaler), 99

Systems analysis. Identification of linear system dynamics using exponential spectral coefficients (Smith and Clement), 122

Symmetric digraphs. On the realization of a(p,s)-digraph with prescribed degrees (Chen), 406

T

Thermodynamics. The Carnot function and the second law (Thomsen), 250

Thermodynamics. On the Clapeyron equation (Potter), 423

Topology of networks. The trunk in the topology of electrical networks (Mullineux and Reed), 188

Transmission lines. Direct computation of transmission matrices of electrical transmission lines (Pipes), Part 1: 275; Part 2: 387

U

Ultraviolet. Indirect ultraviolet spectrophotomatic determination of borohydride using acetone (Lichtenstein and Mras), 481

V

Volterra series. Analysis of an extremum-seeking nonlinear system (Lavi and Mastascusa), 235

Volterra-Wiener series. Volterra-Wiener functionals for the analysis of nonlinear systems (Ku and Wolf), 9

W

Wave propagation. Direct computation of transmission matrices of electrical transmission lines (Pipes), Part 1: 275; Part 2: 387

Minutes of the Stated Meeting

November 16, 1966

The Stated Meeting of The Franklin Institute was held at 8:15 P.M. in the Lecture Hall, preceded by a dinner in Franklin Hall at which 43 Freshmen Members were honored. Mr. William F. Jackson, Vice President, presided and called the meeting to order with approximately 352 guests and members present.

Mr. Jackson stated that the minutes of the Stated Meeting of October 19, 1966 will be published in the November issue of the JOURNAL, and will be presented for approval at the next Stated Meeting of The Institute.

Mr. Jackson presented Mrs. William B. Coleman, formerly an Annual Member, with her Life Membership Certificate and Card and his heartiest congratulations on Mrs. Coleman's becoming a Life Member of The Franklin Institute.

Mr. Jackson then introduced the speaker of the evening, Mr. Ralph M. Evans, Director of the Color Technology Division, Eastman Kodak Company, Rochester, New York, who gave a talk, illustrated with slides, entitled, "The Perception of Color."

Mr. Evans' talk was enthusiastically received by the audience. After numerous questions asked by the audience, Mr. Jackson thanked Mr. Evans for his fascinating talk and adjourned the meeting at 9:35 P.M.

Brown Medal: Bolt Beranek and Newman, Inc., 64

C

Chance, Britton: Franklin Medal, 134
Color center bleaching in corundum. Gamma-ray induced defect bleaching in pressure deformed single crystal alpha Al_2O_3 (Gabrysh *et al.*,) 147
Committee on Science and the Arts. Abstracts of meetings: December 8, 1965,

64; May 11, 1966, 64; January 12, 1966, 134; May 11, 1966, 134; June 8, 1966, 134
Communication theory. Inequalities between information measures and error probability (Chu and Chueh), 121, (BC)
Constant argument impedance. Distributed and lumped RC realization of a constant argument impedance (Dutta Roy and Shenoi), 318
Controller capacity. Improving system sensitivity via surplus controller capacity (Porter), 366
Control system design. Optimal design of digitally compensated systems by quadratic programming (Porcelli and Fegley), 303
Control systems. Stability of control systems with multiple nonlinearities (Anderson), 155
Control systems. Stability of control systems with multiple nonlinearities and multiple inputs (Ku and Chieh), 357
Crack propagation. Bond failure between steel and concrete (Brown), 271
Cylindrical shells. Axisymmetrical deformation of multi-layer circular sandwich cylindrical shells (Kao), 31

D

Defects in irradiated pressured Al_2O_3 single crystal. Gamma-ray induced defect bleaching in pressure deformed single crystal alpha Al_2O_3 (Gabrysh *et al*), 147
Differential equations (stochastic). Stochastic nonhomogeneous Sturm-Liouville problems, (Boyce), 206
Distributed RC network. Distributed and lumped RC realization of a constant argument impedance (Dutta Roy and Shenoi), 318
Driving port functions. New coefficient interrelations of RLC one-port driving functions (Wu and Brown), 389
Dynamic response. Dynamic response of orthotropic plastic cylindrical shells under radial pressures (Venkatraman and Patel), 171

E

Electron emission. Values of Fowler-Nordheim field emission functions: $v(y)$, $t(y)$ and $s(y)$ (Miller), 382
Enzyme reaction. The recording of enzyme reactions within single cells and in tissues of living animals (Chance), 349
Error probability in communication. Inequalities between information measures and error probability (Chu and Chueh), 121, (BC)

F

Filters for pulse applications. A new class of filters for pulse applications (Ghausi and Adamowicz), 20
Franklin Institute
Committee on Science and the Arts: *see* main index
Library of The Franklin Institute: *see* main index
Meetings: *see* main index
Franklin Medal: Britton Chance, 134
Functions of mathematical physics. Values of Fowler-Nordheim field emission functions: $v(y)$, $t(y)$ and $s(y)$ (Miller), 382

G

Gamma-ray and high-pressure effects in sapphire. Some mechanical and optical properties of gamma-irradiated alpha-Al_2O_3 spheres subjected to 30-kilobars pressure (Gabrysh *et al*), 135

H

Heat transfer. Temperature distribution in cylindrical fuel-element end caps at unsteady state (Ma), 9
Heat transfer in solids. Verification of the theory of the thermal trap (Cobble, Fang and Lumsdaine), 102
Hereditary model. Vito Volterra and viscoelasticity (Harvill), 85

I

Information theory. Inequalities between information measures and error probability (Chu and Chueh) 121, (BC)
Interaction of populations. A graphical technique for determining the ultimate (long time) outcome of a competitive interaction within a two-group society (Pittle and Higgins), 291
Interpolation. Mean-square error of step-wise interpolation for various sampling schemes (Leneman and Lewis), 108

K

Kilby, Jack S.: Ballantine Medal, 134
Kunin, Robert: Potts Medal, 64

L

Library of The Franklin Institute, New Books, 62, 133, 191, 270, 346, 426
Linear viscoelasticity. A reciprocal theorem for an aging viscoelastic body (Sackman and Lubliner), 161
Longstreth Medal: Frederick D. Braddon, 134
Low-pass catenary filters. A new class of filters for pulse applications (Ghausi and Adamowicz), 20

M

Matrix realization of RLC N-ports. Canonic RLC N-port networks (Basson and Halkias), 65
Medal Day Proceedings, 410
Meetings of The Franklin Institute: Minutes of the State Meetings: October 19, 1966, 348; November 16, 1966, 427
Molecular biology. The recording of enzyme reactions within single cells and in tissues of living animals (Chance), 349
Multiple scattering. A computational approach to Chandrasekhar's planetary problem (Bellman *et al*), 330, (BC)

N

Networks. Canonic RLC N-port networks (Basson and Halkias), 65
Network theory. Distributed and lumped RC realization of a constant argument impedance (Dutta Roy and Shenoi), 318
Network theory. New coefficient interrelations of RLC one-port driving functions (Wu and Brown), 389
Network theory. Transformless zero removal synthesis (Kim), 242
New class of filters. A new class of filters for pulse applications (Ghausi and Adamowicz), 20
Nonlinear control systems. Stability of control systems with multiple nonlinearities (Anderson), 155
Nonlinear control systems. Stability of control systems with multiple nonlinearities and multiple inputs (Ku and Chieh), 357
Nonlinear oscillations. Forced oscillation of a second order relay system with damping (Fleishman), 298
Nonlinear oscillations. Nonlinear oscillations: amplitude bounds for second-order systems (Aggarwal), 42
Nonlinear sampled-data systems. On bounded-input-bounded-output stability of a certain class of nonlinear sampled data-systems (Iwens and Bergen), 193
Nonlinear systems. Stability of symmetric nonlinear multivariable systems (Lindgren and Pinkos), 92
Nonlinear systems stability. Stability of symmetric nonlinear multivariable systems (Lindgren and Pinkos), 92
Nonlinear systems theory. A graphical technique for determining the ultimate (long time) outcome of a competitive interaction within a two-group society (Pittle and Higgins), 291
Noyce, Robert N.: Ballantine Medal, 134
N-port RLC Realizations. Canonic RLC N-port Networks (Basson and Halkias), 65
Nuclear reactor engineering. Temperature distribution in cylindrical fuel-element end caps at unsteady state (Ma), 9
Numerical methods. A computational approach to Chandrasekhar's planetary problem (Bellman *et al*), 330, (BC)

O

Optimal design. Optimal design of digitally compensated systems by quadratic programming (Porcelli and Fegley), 303
Optical-mechanical phenomenon in Al_2O_3. Some mechanical and optical properties of gamma-irradiated alpha-Al_2O_3 spheres subjected to 30-kilobars pressure (Gabrysh *et al*), 135
Orthotropic plastic shells. Dynamic response of orthotropic plastic cylindrical shells under radial pressures (Venkatraman and Patel), 171
Oscillation. Forced oscillation of a second order relay system with damping (Fleishman), 298

P

Partial polarization. Antenna reception of nonisotropic stochastic fields (Childers), 216
Potts Medal: Robert Kunin, 64

Pressure-influenced defects in corundum (Al_2O_3). Some mechanical and optical properties of gamma-irradiated alpha-Al_2O_3 spheres subjected to 30-kilobars pressure (Gabrysh *et al*), 135
Pressure vessels. Toroidal-type shells free of bending under uniform normal pressure (Murthy and Kiusalaas), 232

R

Radiation into transparent solids. Verification of the theory of the thermal trap (Cobble, Fang and Lumsdaine), 102
Radiative transfer. A computational approach to Chandrasekhar's planetary problem (Bellman *et al*), 330, (BC)
Random (stochastic) field theory. Antenna reception of nonisotropic stochastic fields (Childers), 216
Reconstruction error. Mean-square error of step-wise interpolation for various sampling schemes (Leneman and Lewis), 108
Relay system. Forced oscillation of a second order relay system with damping (Fleishman), 298
RLC networks. New coefficient interrelations of RLC one-port driving functions (Wu and Brown), 389
Rogers, Howard G.: Wetherill Medal, 134

S

Saint Venant's principle. Bond failure between steel and concrete (Brown), 271
Sampling. Mean-square error of step-wise interpolation for various sampling schemes (Leneman and Lewis), 108
Sandwich construction. Axisymmetrical deformation of multi-layer circular sandwich cylindrical shells (Kao), 31
Second-order oscillatory systems. Nonlinear oscillations: amplitude bounds for second-order systems (Aggarwal), 42
Servomechanisms. Improving system sensitivity via surplus controller capacity (Porter), 366
Shells. Axisymmetrical deformation of multi-layer circular sandwich cylindrical shells (Kao), 31
Shells. Toroidal-type shells free of bending under uniform normal pressure (Murthy and Kiusalaas), 232
Shell theory. Dynamic response of orthotropic plastic cylindrical shells under radial pressures (Venkatraman and Patel), 171
Spatiotemporal crosscorrelation. Antenna reception of nonisotropic stochastic fields (Childers), 216
Stability. Stability of symmetric nonlinear multivariable systems (Lindgren and Pinkos), 92
Stability of sampled-data systems. On bounded-input-bounded-output stability of a certain class of nonlinear sampled-data systems (Iwens and Bergen), 193
Statistics. Stochastic nonhomogeneous Sturm-Liouville problems (Boyce), 206
Stochastic boundary value problems. Stochastic nonhomogeneous Sturm-Liouville problems (Boyce), 206
Surface physics. Values of Fowler-Nordheim field emission functions: $v(y)$, $t(y)$ and $s(y)$ (Miller), 382
Systems analysis. Stability of control systems with multiple nonlinearities (Anderson), 155
System design by quadratic programming. Optimal design of digitally compensated systems by quadratic programming (Porcelli and Fegley), 303
Systems engineering. Stability of control systems with multiple nonlinearities and multiple inputs (Ku and Chieh), 357
Systems sensitivity. Improving system sensitivity via surplus controller capacity (Porter), 366

T

Thermal stress. Temperature distribution in cylindrical fuel-element end caps at unsteady state (Ma), 9
Thermal trap effect. Verification of the theory of the thermal trap (Cobble, Fang and Lumsdaine), 102
Thermodynamics. A reciprocal theorem for an aging viscoelastic body (Sackman and Lubliner), 161
Traffic control. Effects of random travel times on the design of traffic light progressions (Gazis and Weiss), 1
Traffic light progressions. Effects of random travel times on the design of traffic light progressions (Gazis and Weiss), 1
Traffic theory. Effects of random travel times on the design of traffic light progressions (Gazis and Weiss), 1
Toroidal shells. Toroidal-type shells free of

bending under uniform normal pressure (Murthy and Kiusalaas), 232
Transformless synthesis. Transformless zero removal synthesis (Kim), 242

V

Viscoelasticity. A reciprocal theorem for an aging viscoelastic body (Sackman and Lubliner), 161
Viscoelasticity. Vito Volterra and viscoelasticity (Harvill), 85
Vito Volterra. Vito Volterra and viscoelasticity (Harvill), 85
Volterra's "equations of growth" problem. A graphical technique for determining the ultimate (long time) outcome of a competitive interaction within a two-group society (Pittle and Higgins), 291

W

Wetherill Medal: Howard G. Rogers, 134

Z

Zero removal synthesis. Transformless zero removal synthesis (Kim), 242
